

Place the Label Protector on the record. Turn on the turntable (or rotate with your finger on the label with the turntable in neutral). Pump two or three mist sprays of G2 Fluid on the record and wait a few seconds.

Hold the pad in this position for at least three revolutions.

Rotate the pad to the center and rear of the pad to remove the excess fluid. Let air dry a few seconds. Enjoy the sound of your clean record!

# Wash This Way

If you've been looking for the simplest, smartest, sleekest solution to clean and preserve your vinyl records, stop. GrooveWasher has your back. Your front. Your whole record collection. It's no secret why. GrooveWasher's formula re-masters perhaps the most successful cleaning system in the history of the record industry.
